

Certificate of Attendance

Delegate Name Kishan Mistry

GDC Number 277250

Course

Course Title DFT Whiston - Foundations for Restorative Dentistry in General Practice: Part 2 (NW180928FWHN1)

Course Date 28 September 2018

Course Venue Whiston Education, Training & Conference Centre, Whiston

Development Outcomes A, C

Verifiable CPD Hours 6

Certificate Issued By HEE - North West

Certificate ID HEENW050807

Course Aims

This day will provide participants with the knowledge required to both competently and confidently undertake a routine dental exam as well as manage patients in pain that present in a General Dental Practice setting.

Course Objectives

During the session participants will: ?

- Gain insight into their own and others personality types. ?
- Review the importance of certain medical conditions and their impact upon dental treatment. ?
- Review what information is relevant when taking a pain history. ?
- Review indications for radiographs in accordance with the latest FGDP guidelines. ?
- Review the anatomy of head and neck as well as dental anatomy and pathology in relation to aiding the diagnosis of orofacial pain. ?
- Learn how dental treatment within the NHS system works.

We confirm that the activity has been quality assured by HEE and that it meets the GDC's educational criteria for verifiable ECPD. This record is full and accurate.

Course Learning outcomes

Following the session participants will be able to: ?

- Communicate more effectively with both patients and colleagues within the dental team. ?
- Understand what to be aware of and how to provide treatment for patients with more complex medical histories. ?
- Be able to take dental and facial pain history that is complete yet concise. ?
- Be able to undertake a comprehensive dental examination with confidence. ?
- Know when certain radiographs are indicated and how to take them. ?
- Understand the importance of dental anatomy in diagnosing pain. ?
- Use a systematic method to move from a differential to definitive diagnosis. ?
- Be able to discuss the cost of NHS treatment with patients and complete FP17DC consent forms.

Reflection

Reflection is an important part of CPD and should form part of your personal development plan (PDP). Please use this page to reflect on what you have learnt, your experience and how it applies to your role. In particular consider:

1. What did you learn (or confirm) from the activity that was helpful or relevant to your daily work and patients?
2. Did you identify any changes/updates needed in your daily work? If so please give details.
3. How will you make these changes and by when?
4. How can you demonstrate that you have implemented these changes as a result of the course?
5. If you didn't identify any changes needed, what did the activity confirm for you, that you may already know or be doing?
6. What was the benefit to your work and/or your patients in carrying out this activity?
7. Do you feel that the activity met the General Dental Council's ECPD development outcomes? If not, please explain why.
8. Any other comments, thoughts or feelings?

OAC consent, root fractures, endo tips, dental anatomy, dental pain, dental materials, surgical seive

Vitality testing cervical area of tooth is more effective due to dentinal tubule arrangement.
Efficacy of using ledermix on vital inflammed teeth rather than going straight to an extirpation.
If an exposure occurs on a tooth with toothache, direct pulp caps are most likely going to fail.
Pain fibre composition.
Useful dental apps.
How to assess restorability SOAP
